Chapter 443: The Creation of Celestial Mothers

The Divine Balance

As the Absolute One, Sung Jin-Woo sought to maintain harmony and purity within his realm, ensuring that his creations thrived in perfection. While the Godverse was filled with celestial beings of immense power, their ability to reproduce and expand their lineage was constrained. To safeguard the purity of their divine traits and enhance their divine hierarchy, Sung Jin-Woo made a pivotal decision: the creation of celestial mothers—female counterparts to his existing creations.

The Purpose of Creation

Sung Jin-Woo realized that the offspring of celestial beings needed to inherit the full spectrum of divine characteristics to serve their purpose in the Godverse. However, intermingling with non-celestial beings diluted their divine traits, resulting in impure offspring lacking celestial abilities.

To prevent this, he decreed that all celestial unions must occur between two celestial beings, ensuring the offspring retained their divine essence.

Thus, he created:

1. Female Angels: Radiant beings of light, possessing the same silver-clad beauty and purity as their male counterparts.

2. Female Dark Angels: Majestic beings of black flame, their beauty as fierce as their power.

3. Female Apostles of God: Born from primordial light, wielding divine authority and purity.

4. Female Dark Apostles: Born from primordial darkness, as powerful and enigmatic as the male apostles.

5. Female Heavenly Soldiers: Noble warriors, their golden armor shimmering with celestial might.

6. Female Dark Heavenly Soldiers: Fearsome and resolute, their presence commanding respect and fear.

The Process of Creation

Using the essence of light, darkness, and divine energy, Sung Jin-Woo crafted each group with meticulous care. These celestial mothers were designed to be as

powerful and perfect as their male counterparts, with an innate ability to nurture and guide the next generation of celestial beings.

He instilled in them:

Celestial Grace: A unique aura that enhanced the divine energy within their offspring.

Immortality and Invincibility: Ensuring they could endure the trials of eternity.

Supreme Intelligence and Strength: Making them equal partners in the celestial hierarchy.

A New Era of Celestial Lineage

With the creation of celestial mothers, Sung Jin-Woo initiated a new era in the Godverse. The unions between celestial beings flourished, resulting in offspring that were stronger, purer, and more attuned to divine power than ever before.

The children of these unions inherited their parents' wings, divine essence, and innate abilities. Their presence added new brilliance to the Godverse, strengthening its defenses and enhancing its glory.

The Divine Decree

To ensure the sanctity of celestial unions, Sung Jin-Woo issued a divine decree:

1. Celestial Purity: All celestial beings must marry and reproduce only within their kind.

2. Offspring Rights: The children of celestial unions would be nurtured and trained to serve the Godverse, carrying out their divine duties.

3. Punishment for Transgressions: Any celestial being who defied this decree by mingling with non-celestial beings would face exile or imprisonment.

The Flourishing of the Godverse

As centuries passed, the impact of this decree became evident. The Godverse thrived with the presence of new celestial beings, each one a testament to Sung Jin-Woo’s vision and wisdom. The celestial mothers became revered figures, their role in shaping the future of the Godverse recognized by all.

Their offspring, born of pure celestial lineage, stood as paragons of divine power, ready to serve and protect the Godverse for eternity.

"The future lies in your hands," Sung Jin-Woo declared to his creations. "Guard it with the purity of your hearts and the strength of your spirits."

Thus, the Godverse entered a golden age of unity, purity, and unparalleled power.
